

Emergency Medical Technician

Emergency Medical Technicians (EMTs) are a vital link in the chain of healthcare. During an emergency, they are typically dispatched to the scene by a 911 operator, and often work with police and fire department personnel. With a minimum of 170 hours of hands-on instructor-led training you will join this group of dedicated healthcare providers and make a significant difference in other people's lives.

Unitek EMT's accelerated program prepares the graduates to successfully respond to emergency calls, provide efficient and quality care to the sick and injured, and transport patients to medical facilities. Unitek EMT's program meets and exceeds program requirements of CA Title 22 and NHTSA EMS Educational Standard to include a minimum 24 hours of clinicals.
